PROJECTS

Project 1

Python eye movement test/Dublin Business school

- Details
- This code is a Python script that uses computer vision and image processing techniques to track and analyze the left eye of a user through their webcam. The script imports several libraries including OpenCV, face-recognition, and pyautogui

Project 2

SFML Graphic/Dublin Business school

on going

Learning SFML graphic library on c++ to copying and making own games such as flappy-bird, strategy-game

Project 3

SQL datase ERD reports/Dublin business school

Software-engineering-class

In this project i involved creating an Entity-Relationship Diagram (ERD) for software-engineering-class database. The ERD was created using a CASE tool and included entities such as students, class, and section. Technologies used lucidchart, word, SQL server

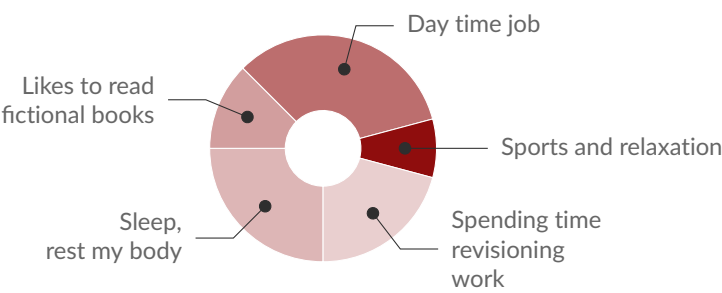

Project 4

Portfolio Website/Dublin Business school

Finished

Created my own portfolio website using HTML, CSS, Javascript for my school assignment made it responsive

A DAY OF MY LIFE

MY LIFE PHILOSOPHY

"It's better to change an opinion than to persist a wrong one"

MOST PROUD OF

Made a decision to live in abroad

When i was 18 i left my home country to persue my career and dream even though i could not speak their language

Living on my own

Despite the challenges of living abroad, such as language barriers and financial situations, it is important to maintain a positive attitude and not give up. This mindset reflects the resilience and determination that are essential for success in any venture, including starting a new life in a foreign country.

STRENGTHS

Hard-working

Problem-solving

Decision-making & Leader

C++

Python

HTML, CSS, JAVASCRIPT

SQL
